SOVIET JOURNAL OF COMPUTER AND SYSTEM SCIENCES

(formerly Engineering Cybernetics)

CONTENTS FOR 1985

Number 1

	English Page	Russian Page
V.A. Plotnikov: Asymptotic Investigation of the Equations of Controlled Motion	1	30
K.G. Grigor'yev and I.V. Ioslovich: Problems of Optimal Control of Cyclic Processes	8	38
V.I. Tsurkov: Two-Level Optimal Control Systems	14	45
A.V. Arutyunov and N.T. Tynyanskiy: The Maximum Principle in a Problem with Phase Constraints	28	60
A.G. Khromov: An Asymptotic Method of Analytical Construction	36	69
A.I. Kibzun, A.A. Lebedev, and V.V. Malyshev: Reduction of an Optimization Problem with Probabilistic Constrains to an Equivalent Minimax Problem	39	73
A.S. Kovaleva: Program Control of Weakly Controllable Stochastic Systems	47	81
A.A. Krasovskiy: A General Condition Favorable for Exact Estimation and New Filtering Algorithms	52	86
A.A. Gvozdik: Solution of Fuzzy Equations	60	176
P.S. Sapatyy: An Active Information Field as a Model of Structural Solution of Problems on Graphs and Networks	67	184
A.Yu. Leviatov: Three Problems of Indirect Diagnostic Methods	88	225
T.M. Vorob'yeva and L.N. Lupichev: An Operator Method of Visual Perception of an External Medium by an Autonomous Robot	94	230
B.I. Gol'dengorin: Correcting Algorithms for Solving Multivariate Unification Problems	99	3
T.D. Berezneva: Economic Equilibrium under Fixed Prices: Rationable Equilibrium. I.	104	8
Yu.T. Medvedev and Ye.V. Pushchinskiy: On an Integer Minimax Problem Arising in the Print Industry	110	15
N.A. Tsarevskiy: Approximation Decomposition Algorithm for a Combinatorial Problem of Development of Production Capacities of an Industrial Sector with Block Production Constraints. I	119	25
A.P. Akimov: A Planning Model Allowing for the Possibility of Fabrication of Items According to Different Flow Diagrams. II	126	33
S.V. Yemel'yanov, I.A. Burovoy, and F.Yu. Levada: Branch-Structure Binary Systems in Control Problems for Nonlinear Nonstationary Dynamic Objects	133	113
A.R. Makhlin and I.S. Ukolov: On the Problem of Analytic Design of Control Systems for Nonlinear Dynamic Objects. I. Method for Solving the ADOR Problem	138	118
B.O. Kachanov and Yu.A. Kochetkov: Optimal Hybrid Control of Continuous Stochastic Systems	145	126
S.K. Volovodov, Ye.N. Rozenvasser, and M.G. Chernyayev: On the Numerical Determination of Periodic Solutions in Systems with Discrete and Continuous Nonlinearities	151	141

Number 2

	English Page	Russian Page
V.N. Vagin and V.G. Kiknadze: Deductive Inference on Semantic Networks in Decision-Making Systems	1	106
A.I. Manevich and P.I. Polyanchikov: A One-Step Method of Conjugate Directions	14	41
L.M. Zaytseva: A Structural Approach to the Determination of the Interrelationships in a System of Random Variables	20	48
V.G. Rumchev: Maintainability and Reachability of States in Manpower Control Problems II. Reachability of States	27	56
V.A. Vyazgin: Some Methods of Sequential Analysis of Variants in the Planning of Technological Systems	33	63
O.R. Men'shikova: A Control Problem with Decentralized Information Structure	38	69
Yu.F. Yakushev: Analysis of Certain Queueing Networks	42	73
V.A. Nagonenko and A.V. Pechinkin: A Light Load in a System with Inverse Order of Servicing and a Probabilistic Priority	51	82
V.A. Netes: Decomposition of Complex Systems When Calculating Their Effectiveness	59	90
A.K. Pulatov: An Automaton Model of Control of a Queueing System with Delay	63	94
V.P. Karelin, S.M. Kovalev and A.N. Melikhov: Decision Making in Control of Manufacturing Processes on the Basis of a Fuzzy Recognition Algorithm	68	100
T.M. Vinogradskaya, B.A. Geninson and A.A. Rubchinskiy: Optimal Rules for Resolving Conflicts in Multiprocessor Systems with Inhomogeneous Resources. II. Method of Solution	74	106
V.N. Bukov and I.B. Solodnikov: Application of a Predictive Algorithm for Controlling Industrial Processes with Delay	80	149
M. Vukobratovich and N. Kirchanski: Decentralized Robot Control using Asymptotic Regulators	86	155
Ya.P. Auzin'sh and P.B. Sliede: Simulation Modeling by Computer of the Dynamics of Manipulator Mechanisms Based on the Implicit Method	94	165
T.A. Gavrilova: Knowledge Representation in the Expert Diagnostic System Autantest	99	168
L.Ya. Rozenblyum: Change from Asynchronous Circuits to Aperiodic Circuits as a Method for Combating the Consequences of Element Instability	107	4
N.A. Starodubtsev: Asynchronous Processes and Antitonic Control Circuits I. Description Language	112	10
N.V. Bagotskaya, M.N. Vayntsvayg, A.M. Dimentman and I.S. Losev: Associative Algorithms of Generalization	120	20
BRIEF COMMUNICATIONS		
L.I. Feygin: Forecasting Completion Times for Operations with Fuzzy Durations	128	171
A.F. Starikov: Invariance in Linear Systems	131	174
B.V. Pel'tsverger: Construction of a Special Basis in State Space for the Decomposition of Nonlinear Multiply-Connected Systems	134	176
V.N. Fetisov: On the Problem of Approximating a Controlled Random Process by a Markov Process	140	184
A.O. Alekseyev: Multivariant Transport Problem by the Time Criterion	146	188
S.N. Ayupov and R.S. Ayupov: Estimation of the Accuracy of the Results of Modeling for Independent Input Variables	147	190
L.V. Vaklev and S.M. Tsonkov: Synthesis of Variable-Structure Systems	150	191
M.D. Davtyan: A Model of Equipment Failures under Mechanical Loads	153	194

Number 3

S.G. Sedukhin: Computational Structures of Algorithms for Finding Paths in a Graph	1	29

	English Page	Russian Page
A.P. Goryashko, N.I. Litvinenko, L.V. Pospelov, and I.I. Pozharov: Test Systems for Contemporary Computers. A Survey of Basic Trends	8	37
V.A. Vishnyakov and O.V. German: Planning of Parallel Processing of Informationally Connected Problems in a Nonhomogeneous Computing System	24	57
V.Yu. Bakenrot: The Efficiency of Planning Algorithms in Multiprocessor Networks	30	62
Yu.P. Lutkovskiy, Yu.N. Mel'nikov and V.A. Myasnikov: Preserving the Integrity of Information in Computational Systems	39	72
Ye.I. Balina and G.L. Brodetskiy: Efficiency of Organization of Storing Intermediate Results for an Unreliable Memory with Restrictions on Its Use	47	80
T.N. Eyngorina and M.Ya. Eyngorin: Analysis of the Configuration of Address Busses for System Engineering of Memory	53	87
G.G. Genkin and A.Yu. Khaykin: Automating the Synthesis of a Relational Logic Schema in Data Bases with a Variable Functional Structure	61	124
L.A. Sholomov: Estimation of the Complexity Characteristics of a Mechanism for Choice with Participation of Several Persons	68	3
A.D. Yudin and E.V. Tsoy: Problems of Generalized Convex Programming with Linear Preferences	79	34
Ye.I. Gordiyenko: Controlled Markov Sequences with Slowly Varying Characteristics. I. The Problem of Adaptive Control	87	53
V.G. Sragovich: Optimization with Constraints on Finite Homogeneous Markov Chains	96	62
Ya.G. Genis: Reliability of Renewable Standby Systems under General Distributions of the Time of Failure-Free Operation of Its Elements	103	70
S.L. Kuz'min: A Problem on a Flow with Limitations on the Number of Transits	110	77
Ye.V. Morozov: A Queueing System $G\mathcal{l}\|G\mathcal{l}\|m$ with Losses from the Queue and with Nonidentical Channels	116	84
BRIEF COMMUNICATIONS		
P.S. Sapatyy: An Algorithm for Singling Out Links in Pipeline Processing	124	132
A.Kh. Giorgadze, P.V. Mandzhgaladze, and A.A. Matevosyan: A Way of Generating a Cellular String of a Given Length	129	135
A.S. Varakin, A.M. Danil'chenko and A.V. Panishev: Optimization of Schedules in a Multiprocessor System	133	138
S.V. Chesnokov: Analysis of the Accuracy of D-Syllogisms in the Statistic of Conjugate Tables	137	141
V.V. Araksyan: Topological Generalizations of the Graph of an Interactive Process	141	144
A.N. Radchenko: Approximation and Exact Formation of Boolean Functions of Many Variables. I. Memory Volume and Approximation Accuracy	144	148

Number 4

V.S. Medovyy: Translation from a Natural Language into a Formalized Language as a Heuristic Search Problem	1	95
M.K. Valiyev: On Temporal Dependencies in Databases	10	106
Kh.K. Brutyan and L.V. Mkrtchyan: Automation of the Design of Database Management Systems	18	116
V.S. Tsirlin: Minimal Basis for Realization of Sequential Circuits	26	91
O.Yu. Pershin: Synthesis of Optimal Radial Networks. I	32	107
D.A. Avetisyan, V.R. Khachaturov, A.V. Zlotov, V.P. Stepanov and O.P. Shchedrin: Automated Design of Autonomous Electrical Networks	38	113
S.V. Yemel'yanov, I.A. Burovoy, and F.Yu. Levada: Binary Control Systems with Nonlinear Comparison Systems	45	120
A.R. Makhlin and I.S. Ukolov: On Analytical Construction of Control Systems of Nonlinear Dynamic Objects. II. A Piecewise-Linear Approach	50	125
A.B. Filimonov and N.B. Filimonov: Modal Control of Multidimensional Objects	55	130

	English Page	Russian Page
F.A. Aliyev, B.A. Bordyug, and V.B. Larin: Design of an Optimal Stationary Regulator	68	143
V.G. Momdzhi and V.T. Taranenko: Optimization of Program Motion of a Nonlinear System with Constraints	76	152
E.K. Lavrovskiy and A.M. Formal'skiy: The Eigenvalues of Systems with a Digital Computer in the Control Contour	82	158
S.S. Kazaryan: A Problem of Distributing a Resource on a Network in a Game Situation	91	61
V.G. Andronov and Ye.G. Belousov: The Stability of Polynomial Optimization Problems with Linear Constraints	97	68
V.A. Irikov and V.N. Trenev: Algorithms for Goal-Oriented Formation of the Parameters of a Model for the Development of an Industry	106	78
N.A. Tsarevskiy: An Approximational Decomposition Algorithm for a Combinatorial Problem of Developing Production Capacities of an Industry with Block Production Constraints. II	115	94
BRIEF COMMUNICATIONS		
G.N. Povarov: On the Comparison of the Boolean Functions with Respect to Normal and Arbitrary Forms	123	146
Z.M. Kanevskiy and V.P. Litvinenko: Minimization of the Average Duration of a Discrete Search Procedure	126	175
A.G. Kovalenko and Yu.R. Khachaturov: A Problem of Allocation of Technological Devices	130	178
I.N. Ayzenberg: Model of a Functionally Complete Element	136	188
A.S. Yushchenko: The Problem of Dynamic Control of Manipulators	139	191
G.I. Lozgachev and M.M. Portnov: Construction of a Variable-Structure Observing Device	143	194
I.V. Medvedev: Determination of the Parameters of Self-Oscillations in Nonlinear Continuous-Discrete Systems	147	197
A.I. Nazarenko: Recursive Method of Optimal Forecasting of a Gaussian Random Process	150	200

Number 5

D.B. Yudin and L.A. Sholomov: Generalized Mathematical Programming and Choice Functions	1	3
M.V. Mikhalevich and V.I. Rymaruk: Algorithms for Determining Saddle Points in Antagonistic Games Defined by Binary Preference Relations	14	17
V.I. Danilov: Ville's Axiom in the Theory of Choice	22	26
V.A. Vyazgin: A Method of Sequential Analysis of Variants for Solving Problems of Planning Dynamic Systems	27	32
A.A. Pervozvanskiy and A.L. Fokin: Optimal Control of a Technological Process	33	44
S.I. Tarlinskiy: On Sufficient Conditions for Optimality of Positional Strategy in a Discrete Game of Encounter	39	87
V.G. Timkovskiy: On the Complexity of Scheduling an Arbitrary System	46	102
B.M. Shtil'man: A Formal Linguistic Model for Solving Discrete Optimization Problems I. Optimization Tools. Language of Trajectories	53	110
V.V. Avetisyan, V.V. Bolotnik and F.L. Chernous'ko: Optimal Programmed Motion of a Two-Link Manipulator	65	123
V.A. Korneyev, A.A. Melikyan and I.N. Titovskiy: A Minimax Formulation of the Stabilization of the Glide Path of an Aircraft in the Presence of Wind Perturbations	74	132
B.N. Sokolov: Stochastic Equivalence of Controls in Optimization Problems with a Quadratic Functional	81	140
S.V. Belokopytov and M.G. Dmitriyev: A Direct Method of Solving Optimal Control Problems with Fast and Slow Motions	88	147
V.A. Komarov: Locally Optimal Estimates of Reachability Sets on Nonlinear Systems	93	153
Yu. Nurges: Synthesis of Laws of Stabilization of Discrete Bilinear Systems	101	179

	English Page	Russian Page
Yu.K. Belyayev: Multiplier Estimates of the Probability of Failure-Free Operation	107	45
N.I. Gorbunov: Quality Control as a Procedure for Rarefying Product Flow	122	65
Ya.G. Genis: The Failure Rate of a Renewable System with Arbitrary Distributions of the Duration of Failure-Free Operation of Its Elements	126	69
G.B. Rubal'skiy: A Simple Optimization Algorithm for Models of Inventory Control for Single-Type Products and "Purely Random" Replenishment Opportunities	131	75
BRIEF COMMUNICATIONS		
B.G. Mel'nikov: Sensitivity of the Optimum Probability Filters	138	209
S.Yu. Vsekhsvyatskiy and V.V. Kalashnikov: Estimates of the Instant of the First Occurrence of a Rare Event in Birth and Death Processes	145	214
A.S. Krasnenker: Random Search Algorithms in the Vector Optimization Problem	148	185
I.R. Shablinskaya: Necessary Conditions for Optimality in Nonsmooth Problems of Control Theory	153	207

Number 6

A.S. Nemirovskiy: Nonparametric Estimation of Smooth Regression Functions	1	50
1945 - 1985 The Fortieth Anniversary of the Great Victory	12	3
V.V. Morozov: Reduction of Multicriterial Problems	14	6
B.M. Shtil'man: A Formal-Linguistic Model for Solving Discrete Optimization Problems. II. The Language of Zones, Translations and the Boundary Problem	17	10
L.S. Gutkin: Generalized Diagram of Exchange Among Quality Indices of a System	29	22
A.K. Romanov and A.I. Terekhov: On the Asymptoticity of Trajectories in Discrete "Flow" Models of Personnel Dynamics	36	40
A. Dvurechenskiy and G.A. Ososkov: The Limit Properties of a Generalized Queueing System with an Infinite Number of Channels	41	60
Ye.I. Gordiyenko: Controlled Markov Sequences with Slowly Varying Characteristics. II. Adaptive Optimal Strategies	47	81
S.L. Kuz'min: On the Complexity of Flow Problems with Path Length Constraints	57	91
G.S. Sadykhov: A Residual Resource Indicator and Its Properties	64	98
V.I. Varshavskiy, M.A. Kishinevskiy, V.B. Marakhovskiy, and L.Ya. Rozenblyum: Functional Completeness in the Class of Semimodular Circuits	70	103
N.A. Starodubtsev: Asynchronous Processes and Antitonic Controlling Circuits. II. Basic Properties	81	115
V.P. Suprun: Polynomial Expansion of Symmetric Boolean Functions	88	123
V.I. Levin: Dynamic Processes in Automata with Periodic Inputs. I. Primitive Inputs	92	128
V.Yu. Bakenrot and A.G. Chefranov: Efficiency of Approximate Algorithms for Distributing Programs in a Homogeneous Computing System	99	135
L.L. Motus: Features of Modeling Software for Embedded Multiprocessor Systems	112	149
O.Yu. Pershin: Synthesis of Optimal Radial Networks. II	119	156
V.A. Abramov, A.I. Piskunov and Yu.T. Rubanik: A Modification of the Bellman-Zadeh Multistep Procedure for Decision-Making under Fuzzy Conditions for Microelectronic Systems	129	166
S.V. Yemel'yanov, I.A. Burovoy and F.Yu. Levada: Binary Control Systems with an Automatically Formed Comparison System Operator	137	174
A.A. Zhevnin, K.S. Kolesnikov, A.P. Krishchenko and V.I. Toloknov: Synthesis of Terminal Control Algorithms on the Basis of the Concepts of Inverse Problems of Dynamics (A Survey)	143	180
L.V. Levantovskiy: An Algorithm for Control of a Dynamic Distributed Parameter System	152	189
